

~~KatrinaSkrovinpelu • Generic Sensor API~~

► Generic Sensor API provides a generic interface, which each sensor extends

▶ Exposes methods to start and stop

▶ Exposed event handlers

Defines a lifecycle

**How it works**

```
interface Sensor : EventTarget {
  readonly attribute boolean activated;
  readonly attribute boolean hasReading;
  readonly attribute DOMHighResTimeStamp? timestamp;
  undefined start();
  undefined stop();
  attribute EventHandler onreading;
  attribute EventHandler onactivate;
  attribute EventHandler onerror;
};

dictionary SensorOptions {
  double frequency;
};
```

~~Katerina Skroumpeliou • Generic Sensor API~~

Generic Sensor APP provides a

generic interface, which each

► Exposes methods to start and

stop

series or extended series

```
interface Sensor : EventTarget {  
  readonly attribute boolean activated;  
  readonly attribute boolean hasReading;  
  readonly attribute DOMHighResTimeStamp? timestamp;  
  undefined start();  
  undefined stop();  
  attribute EventHandler onreading;  
  attribute EventHandler onactivate;  
  attribute EventHandler onerror;  
};  
  
dictionary SensorOptions {  
  double frequency;  
};
```
