Available sensors

Fusion:

Absolute orientation sensor

Relative orientation sensor

Linear acceleration sensor

Gravity sensor

How it works

```
interface Sensor : EventTarget {
  readonly attribute boolean activated;
  readonly attribute boolean hasReading;
  readonly attribute DOMHighResTimeStamp? timestamp;
 undefined start();
 undefined stop();
 attribute EventHandler onreading;
  attribute EventHandler onactivate;
  attribute EventHandler onerror;
};
dictionary SensorOptions {
  double frequency;
```
